CHURCH EXPANSION

5 Big Rocks of REVITALIZATION

1 PARTNER & UNIFY

Before we move ahead with any strategic planning or the implementation of any changes, we want to ensure that there is unity amongst the leadership and within the congregation. We foster unity over time and through a precise method of communication.

2 FIND A LEADER

Whether church planting, campusing or revitalization, each project must have a qualified leader with the gifts to cast vision and mobilize a team towards a clear objective.

3 ASSEMBLE A TEAM AND A VISION

Our experience has taught us that no matter how talented the leader might be, he will never be able to maximize the potential of a church without the variety of talents and gifts brought together in a strategic vision team.

4 RELAUNCH

The church is reintroduced to its community with an emphasis on local, strategic outreach initiatives as well as a marketing campaign.

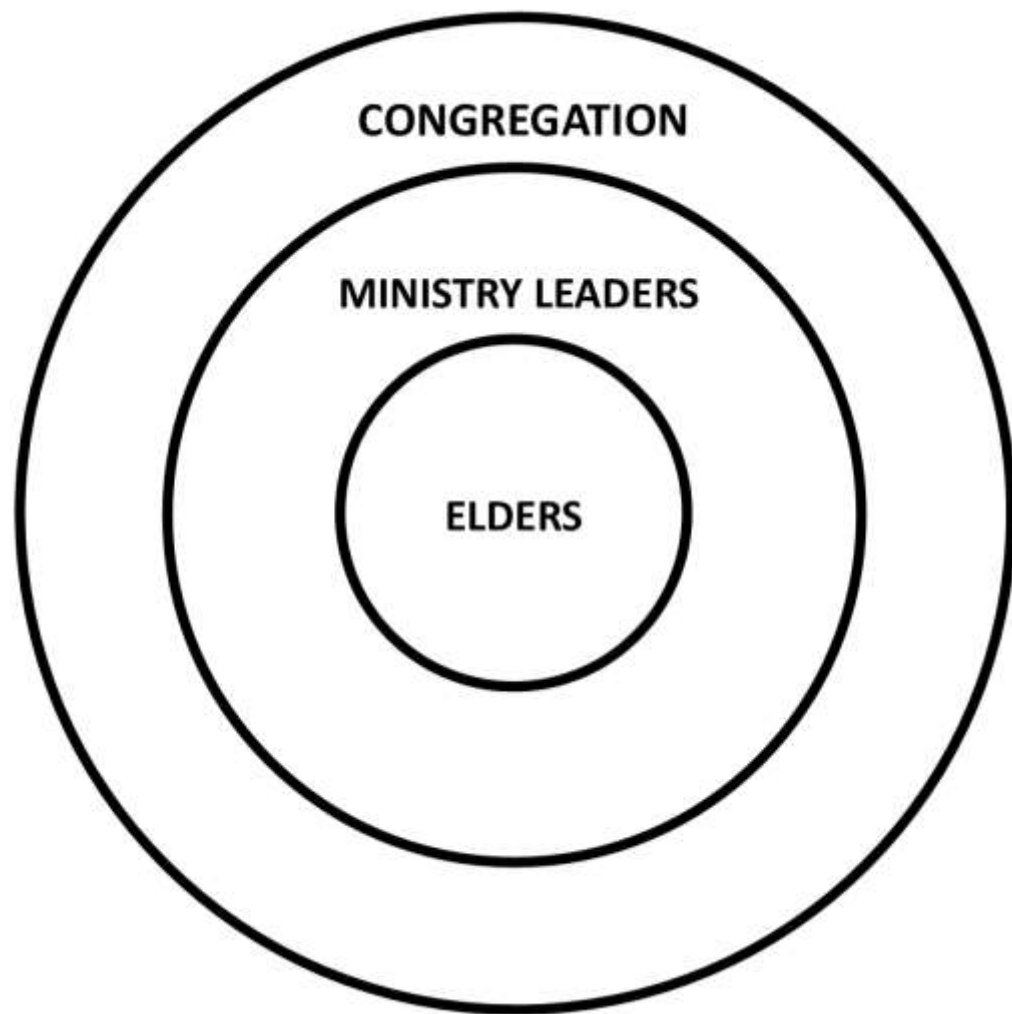

5 BUILD A STRATEGIC PLAN

Before initiating anything new or implementing any change in a church, our goal is to see a complete, cohesive disciple-making and disciple-growing plan developed. This plan will be developed by the leader and his team.

INDEPENDENT PHASE: 3-5 YEARS

The relaunched church works in partnership with Assist to achieve future multiplication and reproduction: new church or campus
